

EXPERIMENT 1 — Create a Kanban Board in Jira

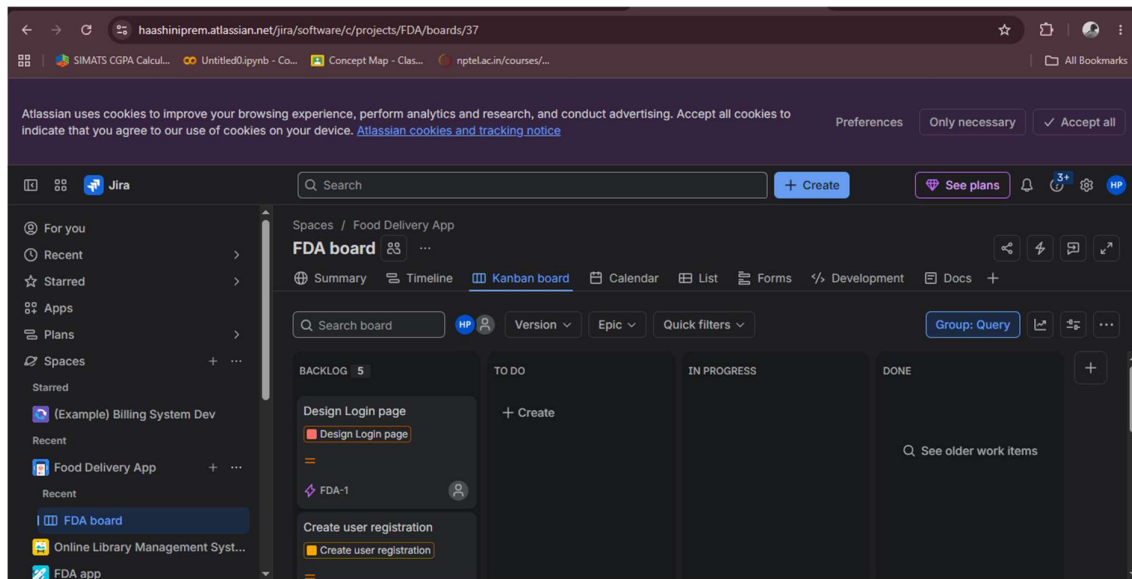

AIM

To create a Kanban board in Jira to visualize tasks and demonstrate the workflow using To Do, In Progress, and Done columns.

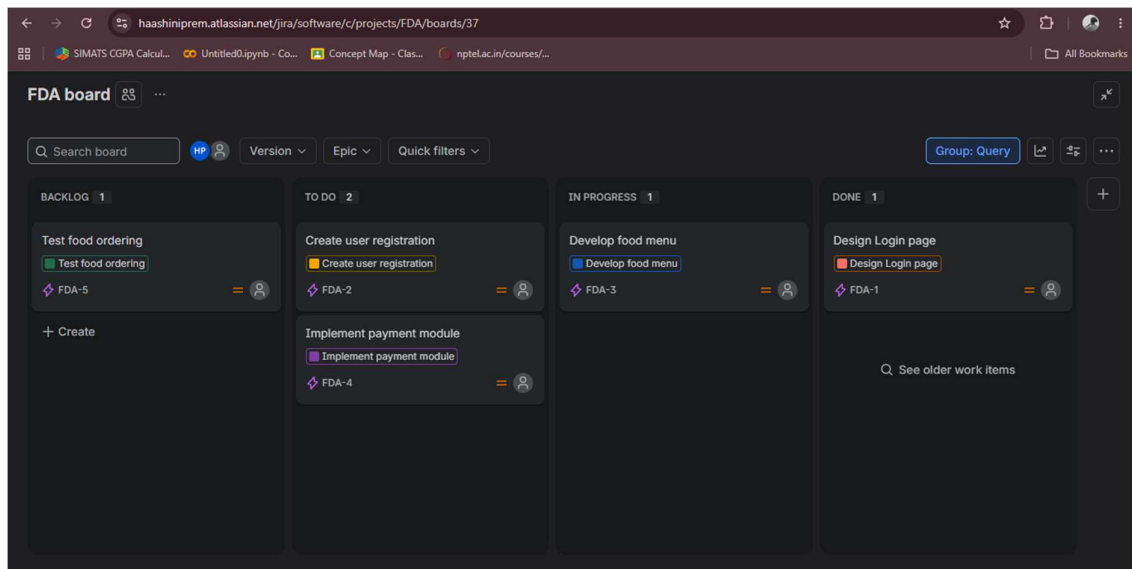

PROCEDURE

1. Logged in to Jira using an Atlassian account.
2. Created a Kanban project named **Food Delivery App**.
3. Configured the board with the columns Backlog, To Do, In Progress, and Done.
4. Created five sample tasks:
 - Design Login Page
 - Create User Registration
 - Develop Food Menu
 - Implement Payment Module
 - Test Food Ordering
5. Added the tasks to the board and arranged them in the To Do column.
6. Dragged the tasks from To Do to In Progress to represent ongoing work.
7. Moved the completed tasks from In Progress to Done.
8. Observed the task workflow using the Kanban board.

SCREENSHOTS

Screenshot 1: Kanban board displaying the five sample tasks.

Screenshot 2: Kanban board showing tasks moved between To Do, In Progress, and Done.

OUTPUT

A Kanban board was created successfully in Jira with five sample tasks, and the movement of tasks across the workflow columns was demonstrated.

RESULT

Thus, a Kanban board was successfully created and used to visualize and manage the workflow of tasks in Jira.
